

The background image shows a bright, modern office space. In the foreground, a large glass door with a white frame is partially open, revealing a white ergonomic chair inside. The floor is made of light-colored wood in a herringbone pattern. In the background, there are more glass-walled offices and desks with computers.

**The trade fair dedicated to workspace
design is back !**

SEPTEMBER 01 to 03, 2020

Paris - Porte de Versailles - Pavilion 1

Eco-designed, environmentally friendly work furniture

WORKSPACE
expo

Workspace Expo, organized by **Weyou Group**, is a very unique trade show in France. For its 2020 edition, it will welcome from **September 1 to 3** at the **Parc des Expositions Porte de Versailles** in **Paris (Pavilion 1)**, more than **300 French and international brands** specialists in workspace design.

A trade show on

France

2nd largest European market
in terms of turnover spent
on work space design

**300 French and
international brands
present at the show**

Sokoa Kulbu Pouf © SOKOA

The **KULBU footstool** has been designed as a pure and well-balanced "object-functional". It provides additional seating in the various indoor and outdoor work areas. It has also been designed as a "functional object". comfort" which, like a yoga ball, provides dynamic support thanks to its natural rocking movement. Finally, it is an "eco-object", composed of 74% plant-based polyethylene extracted from sugar cane residues from sustainably managed plantations.

Senseat One © MAANS

The **SENSEAT ONE** armchair offers a moment of amplified musical relaxation with its backrest that vibrates in rhythm with the sound. The shell of the chair is made from a composite material of flax fibre and resin, bio-sourced. It is entirely made in France.

L'arche © LEET DESIGN

L'ARCHE is the first **acoustic booth** to be industrially produced in France with sustainable, recyclable and recycled materials. The materials used in its manufacture have been meticulously selected to meet criteria of acoustic performance, durability and non-toxicity for the environment and its users. Adapted to new workspaces, these Arches integrate seamlessly into their environment to bring privacy and silence to the breasts of shared workspaces.

Every human activity, whether economic or not, has an influence on the environment. The aim of eco-design is to reduce the environmental impacts of a product throughout its life cycle.

This approach is part of the "social and environmental responsibility" (SER) strategy of companies in the furniture sector

A multi-stage approach: it takes into account all stages of the product life cycle (extraction of raw materials, production, distribution, use and end of life).

A multi-criteria approach: it takes into account the consumption of materials and energy, discharges into the natural environment, effects on the climate and biodiversity.

A multi-stakeholder approach: suppliers, as well as recyclers, repairers and reclaimers are an integral part of a product's life cycle, as are consumers, buyers or users who influence the use phase.

PRACTICAL INFORMATION

ABOUT WORKSPACE EXPO

From September 01 to 03, 2020 in Pavilion 1 of the Porte de Versailles Exhibition Centre, more than 300 renowned French and international brands will present their innovations and solutions for reconciling productivity and well-being, time saving and comfort.

Workspace Expo is the only trade show in France entirely dedicated to the furniture and fitting out of work spaces, in which France invests more than 1,3 billion euros each year.
